

Setup guide Column Speaker System

1

Lift the subwoofer off the wheel dolly and place it on a stable surface.

Place the middle speaker column on top of the subwoofer.
(middle columns have connections on both side of the column)

2

3

Place the top speaker column on top of the middle column.
(top columns only have a connection on the bottom of the column)

Plug the Power Plug into the power input of the speaker.

4

5

Plug the XLR signal male plug of the combination cable into the speaker input connection.

Plug the XLR signal female plug into your audio mixer or DJ mixer.

6

7

Plug in the Schuko Power Plug into a power supply near the mixer. You can use the 4-way multi-socket for cable length and split.

You can now switch on all equipment and adjust to the desired volume.
You are all set now to use the equipment.

8

To dismantle this audio set, please run the above-mentioned instructions in reverse (step 8 to 1)
